To Anyone Who has Ever Owned a Home:

After buying THE fixer-upper of a lifetime, I called Mike and John to repipe the whole house with copper, put in new drainage and sewer lines, install two tankless water heaters, put in two commodes and even draw a drainage line for a new heating and air conditioning unit. They are talented workers who worked efficiently, affordably, and did their job on time. If you've ever dealt with home improvement workers, you know that it is sometimes a crap-shoot on what you'll get, but with Care Plumbing, I got much more than I had hoped for. I highly recommend them for any size plumbing job.
