Care Plumbing came to my house and installed all new copper pipe. My house was built in 1954 and the galvanized pipe was a mess. John, Mike and his crew came to the house at the time they said they would be here. They put all new copper pipe in the house in one day as they stated. The patch work and clean up was very good. We now have decent water pressure and don't have to worry about the old galvanized pipe breaking.

Care Plumbing did an excellent job. The workers were courteous and pleasant. Care Plumbing's work is excellent and I wouldn't hesitate to use the company again. I would recommend Care Plumbing to anyone thinking of having plumbing work done, especially a major plumbing job.
