

Care Plumbing are hands-down the very best plumbers that my mother and I have ever dealt with. Care plumbing gives plumbers a good name. you know that you are dealing with honest plumbers when they tell you that certain repairs and upgrades are unnecessary and they would only be taking our money for no good reason. John and Mike, the principles, acomodated our urgent situation, hectic schedule, and difficult circumstances.

Care plumbing's whole crew was diligent and courteous. In fact, I have to say that Care Plumbing was a godsend. They are responsible, courteous, and very trustworthy. Not only did they provided quality service, but they also beat the other quotes by a large margin. I recently recommended them to our neighbor who was also pleased with their work and professionalism. We heard of Care Plumbing through our contractor. We contacted them immediately and believe it or not, on a Sunday, John stepped out from his family barbeque to diagnose our problem. He recognized the urgency of our situation and made us a priority.

They copper repiped our house, put in quality replacement for aging fixtures, replaced damaged drain lines, and patched the walls and ceiling where they had to make access maintaining a clean and neat environment [WE HAD A LOT OF STUFF THEY HAD TO WORK AROUND], installed reverse-osmosis water filter, shower heads, a new toilet. I have since used them and was again pleased with their outstanding work. I highly recommend Care Plumbing .
